

SPUR Organization Survey Results

March 19th, 2021

Department of
Family Medicine

Overview

16 organizations provided data

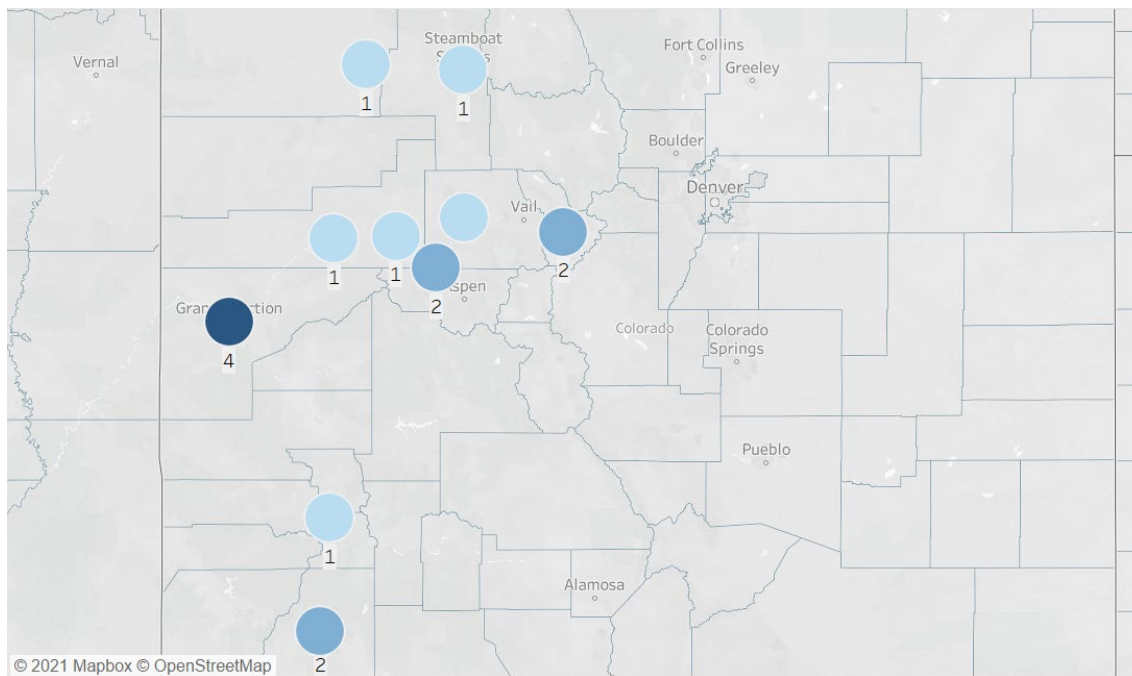

Covered organization characteristics, activities and services to address suicide, and research and evaluation activities

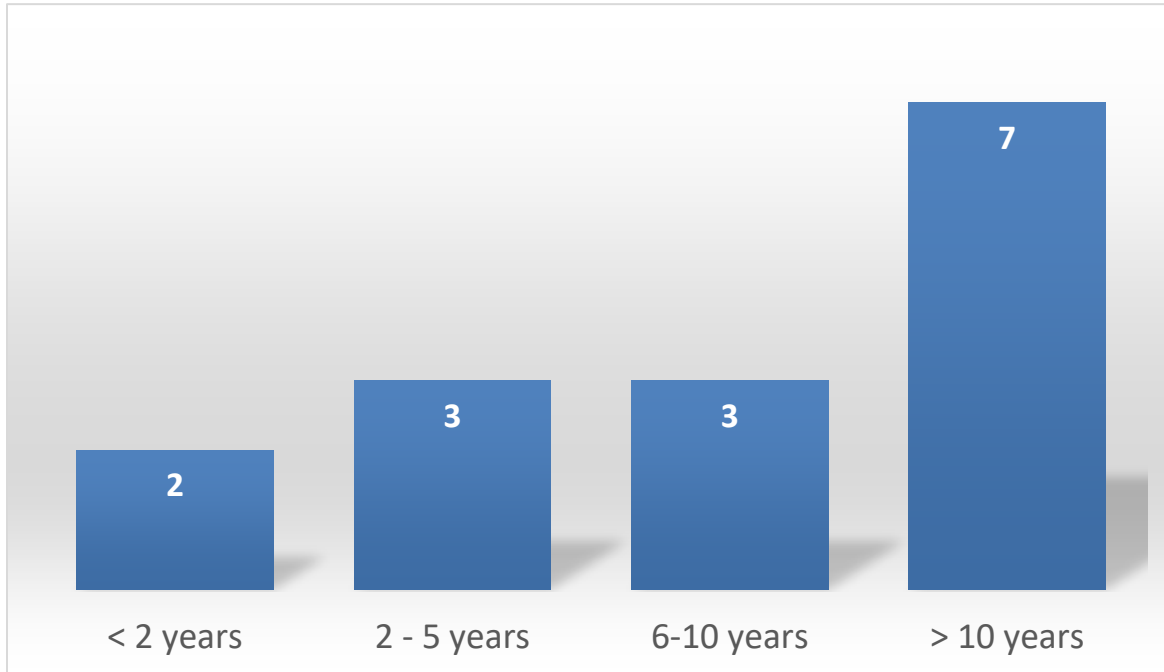

Some results shared here, all will be used to guide our work over the next year

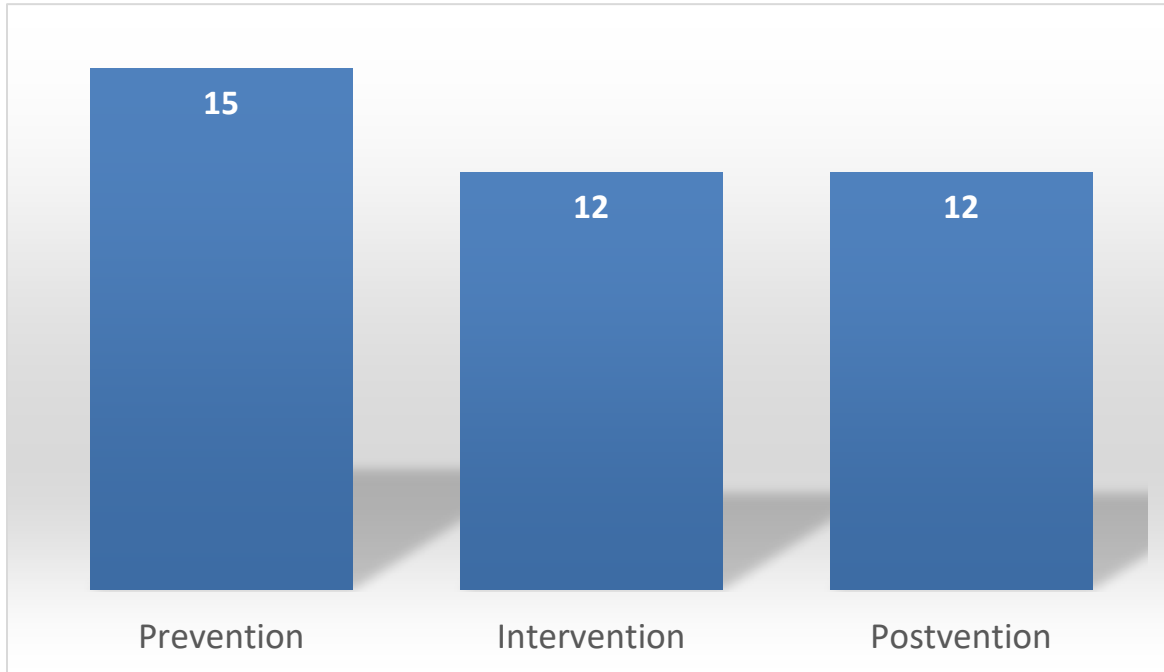

Organization locations

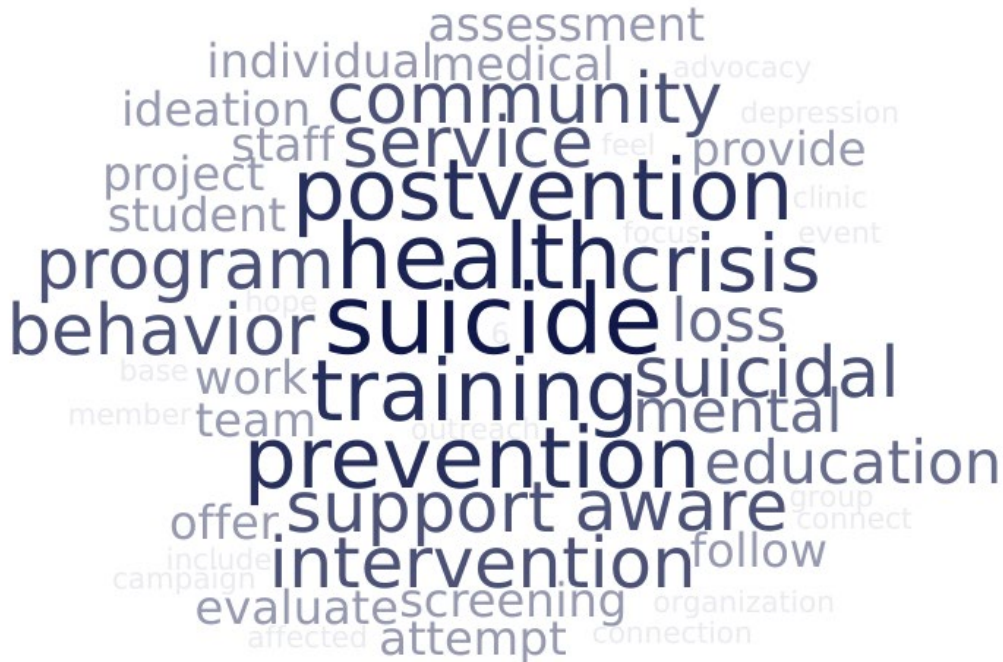

Years involved in work to address suicide

Services conducted

Work descriptions

A word cloud of various terms related to mental health and community service. The words are arranged in a roughly circular shape, with some words being larger and more prominent than others. The colors of the words range from light blue to dark blue. building durango alliance

Evaluation of programs, service and activities

Other thoughts?

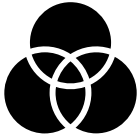

Department of
Family Medicine

Key research/learning topics of interest

How can we use community- and program-level data to better evaluate activities?

What information do we need to effectively integrate work to improve social determinants of health (SDOH) with efforts to address suicide?

How do we collaborate across communities to learn from each other's experiences with program implementation?

How do we work together to learn more about the underlying causes of suicidality?
